

Someone

Von Faie

There is someone out there who says talk to me
There is someone out there who says come to me
There is someone out there who thinks I can trust to him...
...but I can't

There is someone out there who hurts to me
There is someone out there who touched on me
There is someone out there who wants to me...
...but I can't

There is someone out there who says he believes on me
There is someone out there who lies to my face
But there is also someone out there I hate more than the other
...but he is still in my life

There is someone out there who says he loves me
There is someone out there who did things to me I never want
But there is someone out there who never will talk about
There is someone out there who says ...
...but NO! I don't want to hear it!!!

.... Silence ...

That was a long.... long time ago

There is someone out there who will forget that
There is someone out there who will forget me
There is someone out there who will forget...
...it

There is someone who never will feel it again
There is someone who will live like before

But there is person out there who can never do that like him
It's a person like....

...Silence...
